

Welcome from your Local Organising Committee

It's so exciting to be hosting the Conference here in the North of England. The planning and organisation has been a real team effort with a consortium including several universities: University of Bradford, Manchester Metropolitan University, University of Huddersfield and Leeds Metropolitan University. Alongside our Local Organising Committee's enthusiastic input we have been able to draw on guidance and support from the ISCHP Executive Committee, especially Shona Crabb who organised the 7th Biennial Conference in Adelaide in 2011. Also special thanks to Rebecca Durrans, Ana Gonzalez, Sarah Jackson, Angela Rutherford and Liz Walters for all their hard work behind the scenes.

Our aim has been to maintain the inclusivity and participatory ethos of the ISCHP bi-annual event but also to infuse this with what makes us different here at Bradford in the North of England. We have a fabulous programme which includes exhibitions, novel modes of presenting and the now famous (infamous?) 5 minute challenge. There is also a comprehensive set of parallel sessions aimed at stimulating debate and enthusiasm for our research and critical agenda in health psychology.

If this is your first visit you will surely be impressed with this part of the country – lots of magnificent countryside that is home to a vibrant and wonderfully diverse community. West Yorkshire is fabulous! Although we know you will find it impossible to pull yourself away from the conference we have a social programme planned that aims to ensure both our home delegates and those travelling from afar will remember ISCHP at Bradford for many years to come.

Have a tremendous time in sunny (well we will try) Bradford!!
